terms & conditions

warranty

For all indu+ products, a warranty period of 2 years against factory or material defects that would affect their use applies. The warranty begins on the day the product is purchased from an official indu+ trading partner (as per the date on the purchase receipt).

Any product believe to be of faulty materials or workmanship should be reported to indu+ immediately after unpacking.

The 2-year warranty applies to material and manufacturing defects that arise under normal use, not defects or imperfections due to the passage of time or normal use (wear and tear). Conditions not covered by this warranty include - but are not limited to - changes in wood textures, scratches caused by use, damage due to inadequate maintenance or improper use, etc. For example, the warranty does not cover cracks, scratches, or lacquer cracks that arise from use or damage due to water in the induction hob.

Reporting of complaints:

In order to look in to complaints/warranty issues, indu+ requires all of the following information provided in one single email: photographs of the issues -general overview and close-ups of specific areas of damage and/or failure. Date of purchase: please send a copy of the invoice as proof of the purchase date. Location of furniture, e.g. coastal/inland/swimming pool. Brief description of the damage and how the damage occurred.

Please always use a reference, i.e. a customer number in the title of the email so that is easy to track. Potential claims can be processed only if indu+ receives all necessary data. Once all the above information has been received, we will review the case and advise in due course.

cooking plates - points of attention

Our induction hobs can stand a temperature of -28°C to +80°C and a humidity of 95%.

- The induction hobs are not 100% waterproof due to ventilation needed to cool the electronics down.
- The induction hobs need to be covered at all times when not in use.
- Be aware that no water can go into the electronics
- It is better to install the induction hobs under a shelter and do not leave them in the rain the entire year. A small rain shower is not a problem.
- The more you use your induction hob, the better, so condensation cannot touch the electronics.
- If you will not use the induction hob for a while, we advise you to store them in a dry place.

* Induction hobs are IP21 rated

* Warranty for private use = 2 years

Warranty for professional use = 1 year

*No warranty on glass breakage

trolleys - points of attention

When exposed to natural weather conditions, teak's colour will change to a soft silver-gray. This is a natural process.

Wipe away grease stains on the wood as soon as possible.

Wood is a natural product and is "alive".

MAINTENANCE OF TROLLEY

FEATURES

- Powder-coated aluminium
- "Tente" wheels with ball bearings

MAINTENANCE

- Clean the base with warm water;
- Use mild soap for stubborn stains;
- Use a soft sponge or cloth, not an abrasive sponge.

WOOD MAINTENANCE

PROPERTIES

- Teak is a hardwood species, grade AB with durability class I.
- The wood has been carefully controlled.
- The wood is a natural product and can start to crack due to drying out.

TREATMENT

The wood of our trolleys is delivered treated. They are treated with Rubio Monocoat. This product enhances the colour of the wood and stops stains and ageing.

MAINTENANCE

- Use the exterior wood cleaner & exterior soap to remove grease stains from the wood.
- Grease stains which are noticed immediately can be cleaned off with a damp cloth and washing-up liquid.
- Do not use aggressive agents to clean the wood.
- After some time, the wood may stain from cooking. To return it to its original state, it can possibly be sanded and treated again with Rubio Monocoat.
- Always cover your trolley with the cover when not in use. Allow the teak to dry before using covers to prevent mold growth

PROTECTIVE COVERS

HANDLING & CARE

- Our covers are made of Superdry, a polyester fabric. Superdry is water repellent and UV-resistant, with outstanding breathability and durability.
- Make sure that your outdoor kitchen is completely dry before applying the cover, this to avoid mold and mildew from forming on your kitchen.
- Take care to prevent puddles of water from forming on the covers surface.
- For longer periods, e.g. during wintertime, we recommend storing your outdoor kitchen in a dry place indoors.
- The protective cover can be washed at 95°C.
